Greetings!

Would you like to lose weight, raise money for a good cause and be eligible to win some great prizes? Women's Digital Imaging is a sponsor of the Face Off USA Weight Loss Challenge Contest and we'd like to invite you to join.

The contest has been created by Dr. William Song of OmniHealth Pro. Participants will get pledges for pounds (or body fat) lost. The money will benefit Project Ladybug, a program for seriously ill children at St. Joseph's Hospital in Paterson, NJ. Great prizes will be awarded for the most money earned. There is a teleconference every Thursday night until the contest ends with guest experts to get you motivated and help you reach your goal. Visit the website now for details on how to register and participate: <http://faceoffusa.com>

WDI is giving all participants free before and after DXA Total Body Fat Analysis exams so you can accurately plan your weight loss program and measure results. After you register for the contest, call us at 201/444-4484 to make an appointment for your free DXA Total Body Fat Analysis.

Have fun and get healthy!

About Women's Digital Imaging

Women's Digital Imaging is committed to your health, care and comfort. We diagnose conditions that affect women such as cancer and osteoporosis and encourage a screening schedule, customized to each patient, to detect disease at the earliest stage possible. WDI utilizes the most advanced technology including Digital Mammography, Breast Specific Gamma Imaging, Ultrasound, and DXA Total Body Composition. We perform biopsies, including stereotactic biopsies, in our office.

biopsies, including stereotactic biopsies, in our office.

We are an out of network, fee for service provider. We will assist you in securing the out of network and preventive care services you are entitled to under your insurance policy.

For more information, call us at 201/444-4484 or visit us on the web at www.womensdigital.com

Sincerely,

Lisa Weinstock, M.D
